Although they are more properly known as the Norse, or Norsemen, "Viking" is a catch-all term for the people who came from Scandinavia; which is now Norway, Denmark and Sweden; between the 8th and 11th centuries. They have long had a notorious reputation as the raiders and pirates of the medieval world and certainly it is not unjustified: their raids were fearsome and long-running. However, they were also explorers and skilled seafarers, managing to spread across Europe and east into Asia, south to northern Africa and as far west as Newfoundland. They established trade routes across the known world and settled in northern Britain, Ireland and among the Franks, forming the Kievan Rūs kingdom on the River Volga. The Norse were initially pagan and targeted the wealthy Christian monasteries in their raids, but they later converted. A few of the stunning stave churches they built in Scandinavia can still be seen today.

Memory is vital to form a person's identity and provide the stable sense of reality we need to function in daily life. Despite memory's fundamental importance, its basis in the brain remains largely mysterious. Attempts to develop computer models of the brain show that memory is far more complex, and often counter-intuitive, than any system yet devised by software designers. A memory is a far cry from the information stored on a hard drive or in the Cloud: it can not only fade and disappear, but be falsified. Recently, scientists have begun to probe for memory's basis in the brain on a cellular level, using tools such as optogenetics to manipulate neural circuits in living animals. Despite rapid progress, they are still far from grasping the neuronal processes by which a fully-fledged memory is formed, stored, and retrieved. It's easy to take memory for granted. Only when it fails, because of diseases such as Alzheimer's, a head injury, or other brain insults, do we appreciate the myriad complex components that constantly have to be coordinated to sustain it.

43. The author is of the opinion that - - - -.

- A) having retention ability is the only thing scientists try to develop for future generations
- B) memory plays a crucial role in composing a person's identity that we need to lead our daily lives
- C) head injures are the main reasons of some illness such as Alzheimer's is and some brain defects
- D) in the case of brain defects, computer brain models will be vital for us
- E) because of the rapid change in computer science we are on the edge of understanding the neuronal processes

44. It can be inferred from the passage that - - - -.

- A) despite being highly important memory is still incomprehensible for many of us
- B) scientists have grasped many aspects of neuronal processes so far
- C) memory is sophisticated but not often instinctive compare to any system invented by software designers
- D) the retention ability that we have can not fade away, but be falsified
- E) the memory can be thought the same way as any storing systems such as a hard drive or a cloud

45. According to the passage it can be understood that - - - -.

- A) scientists will begin to study memory's basis in the brain on a retention span level in near future
- B) the identity of people is insufficient to provide the sense of well-being we need to function in daily life
- C) some illnesses such as Alzheimer's are incurable in spite of recent improvement in the filed of memory
- D) hard drive and other memory devices will be used to investigate the brain insults seen in the old
- E) scientists try to understand the memory, using optogenetics to study neural circuits on living animals

DNA profiling is universally accepted as the highest standard for identification in forensics, and it has been used successfully for decades to convict or acquit suspects. In fact, a 2009 National Research Council report on forensic science eviscerated all other identification techniques, from fingerprinting to bite mark analysis, holding DNA as uniquely capable of reliably distinguishing between any two people on Earth. But DNA also has limitations. It can degrade and be difficult to extract from trace evidence, such as skin and hair. So Glendon Parker, a biochemist at the University of California, has been studying unique markers in the proteins made by DNA. "The major advantage is that protein, particularly hair protein, is more stable than DNA," he explains.

46. It is understood from the passage that DNA profiling - - - -.

- A) is a method that has been used since ancient times
- B) is used both to accuse someone and to find someone innocent
- C) began to be used universally after the report in 2009
- D) gained a scientific value after it began to be used in forensics
- E) became a more successful method after 2009

47. According to the National Research Council, - - - -.

- A) there are few methods at least as reliable as DNA
- B) it is not possible to ignore all other identification methods other than DNA profiling
- C) there may be something DNA and proteins can't identify in any two people in the world
- D) there is nothing better for the identification in forensics than DNA
- E) fingerprinting and bite mark analysis are incomparable in identifying the criminals

48. The point made in the passage is that - - - .

- A) it can sometimes be hard to obtain DNA for identification
- B) forensic science is now in its peak with DNA profiling
- C) though DNA is unique in the identification of criminals, National Research Council doesn't accept this fact
- D) DNA in skin and hair is more advantageous to forensics
- E) DNA profiling is a limited technique compare to fingerprinting

50. We understand from the passage that - - - .

- A) David Lloyd George retired in 1945, when he became a Lord
- B) David Lloyd George took different offices throughout his life
- C) it was when he became a solicitor that David Lloyd George was the most successful
- D) by the time the first World War started, David Lloyd George had already become the minister of munitions
- E) Carnarvon is a city in north Wales

49 - 51. soruları verilen parçaya göre cevaplayınız.

David Lloyd George was prime minister from 1916 to 1922, and was hailed as "the man who won the war". Born in humble circumstances, he grew up in north Wales. After qualifying as a solicitor, in 1890 he was elected Liberal MP for Carnarvon, a seat he would hold in every election until his elevation to the Lords in 1945. He served as president of the board of trade and then chancellor of the exchequer in Liberal administrations, helping to introduce reforms such as old age pensions and National Insurance, but his 1909 'People's Budget' was rejected by the House of Lords, sparking a constitutional crisis. In 1915, a year after the outbreak of the First World War, he became a highly effective minister of munitions. He succeeded Asquith as prime minister in 1916 and, after the German surrender, won a landslide victory in the 'Coupon Election' of 1918. He played a pivotal role in the Treaty of Versailles, but was forced from office in 1922.

49. According to the passage, David Lloyd George - - - .

- A) became prime minister after the First World War
- B) took office as a solicitor after winning the war
- C) succeeded in remaining an MP for 55 years
- D) had to end his active political life in 1922
- E) spent all his life in north Wales, where he was born

51. Which of the following can be inferred from the passage?

- A) The constitutional crisis began because of the First World War
- B) David Lloyd George became the prime minister after Germany admitted defeat
- C) Treaty of Versailles resulted in David Lloyd George resigning his office
- D) although David Lloyd George won the Coupon Election, he couldn't be effective in the Treaty of Versailles
- E) David Lloyd George's family lived a modest life during his babyhood

A sign of growing community among Greeks is the founding of Panhellenic athletic games in 776 B.C. The first games were held at Olympia, in the Peloponnese, and were dedicated to Zeus; thus from the beginning, the games were connected with religion and demonstrate that religion can have wide uses in a community. But they were also a way of celebrating human perfection and heroism, an aspiration of Greek civilization. Originally, the Olympics featured only foot races and wrestling, but gradually they came to include other events like boxing, javelin throwing and so on. Only the winner gained a prize, an olive wreath, but victory also brought rich awards from one's city and lifelong glory. The modern myth of amateur athlete was unknown to the Greeks. In imitation of the Olympics, other cities founded games, and there was eventually one set of Panhellenic games each year, as well as games in many individual cities.

52. It is clear from the passage that the Olympics - - - - .

- A) were religious because Zeus wanted them to be held
- B) were somehow related to religion as they were devoted to Zeus
- C) were held in memory of Zeus in the beginning
- D) were the games the Greeks began to love as the community grew
- E) were held just for Zeus at Olympia, but after some time it they gained popularity

53. We can understand from the passage that - - - - .

- A) Greeks were a community with a lot of religious ceremonies
- B) the Olympics-like games had already been held before Greeks began to hold the Olympics
- C) foot races and wrestling were the two most important games
- D) in the Olympics there were few games in the very beginning
- E) the winner of the javelin throwing and boxing had richer awards than the other winners

54. What is stated in the passage about heroism in Greeks?

- A) It was used as a means to promote Greeks to other cities.
- B) It was demonstrated in the best games of the Olympics, particularly for Zeus.
- C) It was already a characteristic desire in Greek civilization.
- D) It was nothing more than religion.
